B-Side is a collection of various tracks & jingles found throughout the game, including the alternate themes for each level's different areas. It matches the game well: it's warm, fun, full of energy.

But the main themes, what I'd assume most people'd be looking for, are found in the standard soundtrack; except for the DLC themes which are in here.. I love all of the songs from the game~ I'm just eagerly awaiting the latest DLC tracks :D. WHERE'S MY NYAKUZA SONGS YOU BIG NERDS!

In all seriousness I highly recommend getting B-Side if you like having the soundtracks of games. The remixes are great, and it was really cool to hear some of the other unimplemented tracks! I really think it's well worth the price.. You could listen to one track a day and it will take 4 months. This is 4 months worth of content right here.. More great songs. Especially the Death Wish track, for Death Wish boss fights.

Recommend it.
